

Project Evaluation and Control

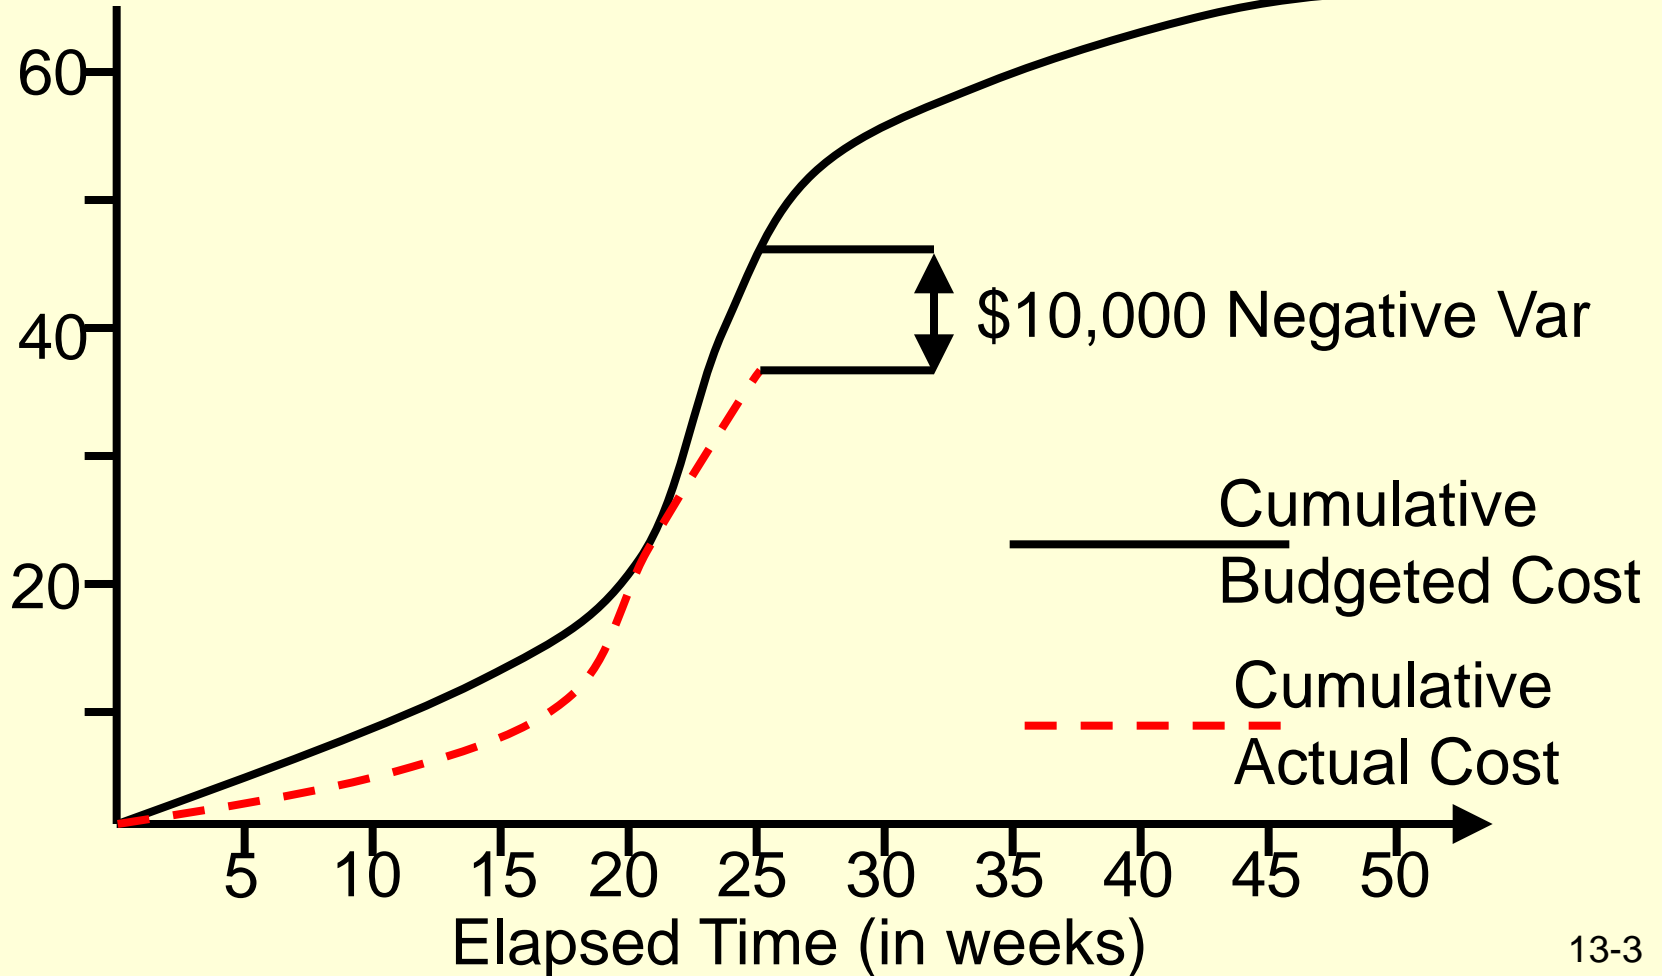

Chapter 13

The Project Control Cycle

The Project S-Curve

Cumulative Cost
(\$ in thousands)

Milestone Analysis

Milestones are **events or stages** of the project that represent a **significant accomplishment**.

Milestones

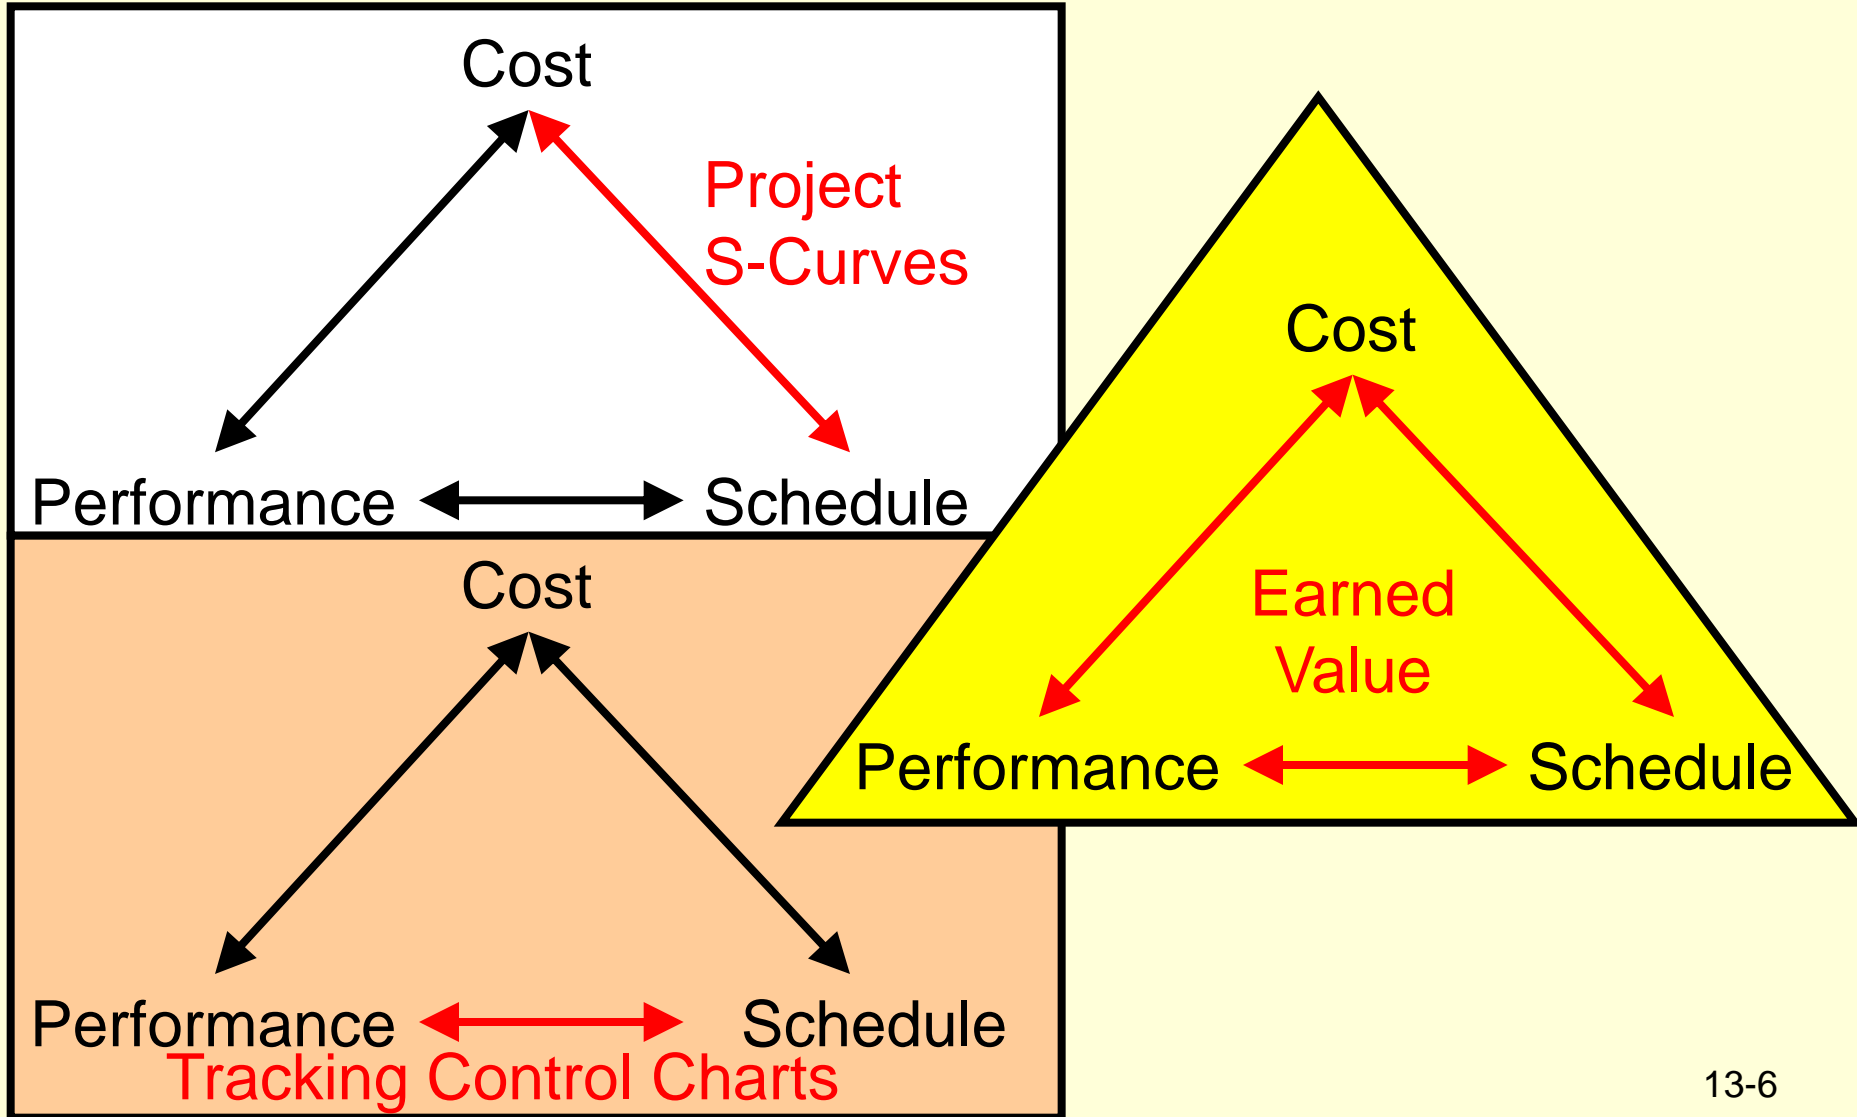

- ...**signal** the team and suppliers
- ...can **motivate** the team
- ...offer **reevaluation** points
- ...help **coordinate** schedules
- ...**identify** key review gates
- ...**delineate** work packages

Tracking Gantt Chart

Project status is updated by linking task completion to the schedule baseline

Earned Value Management

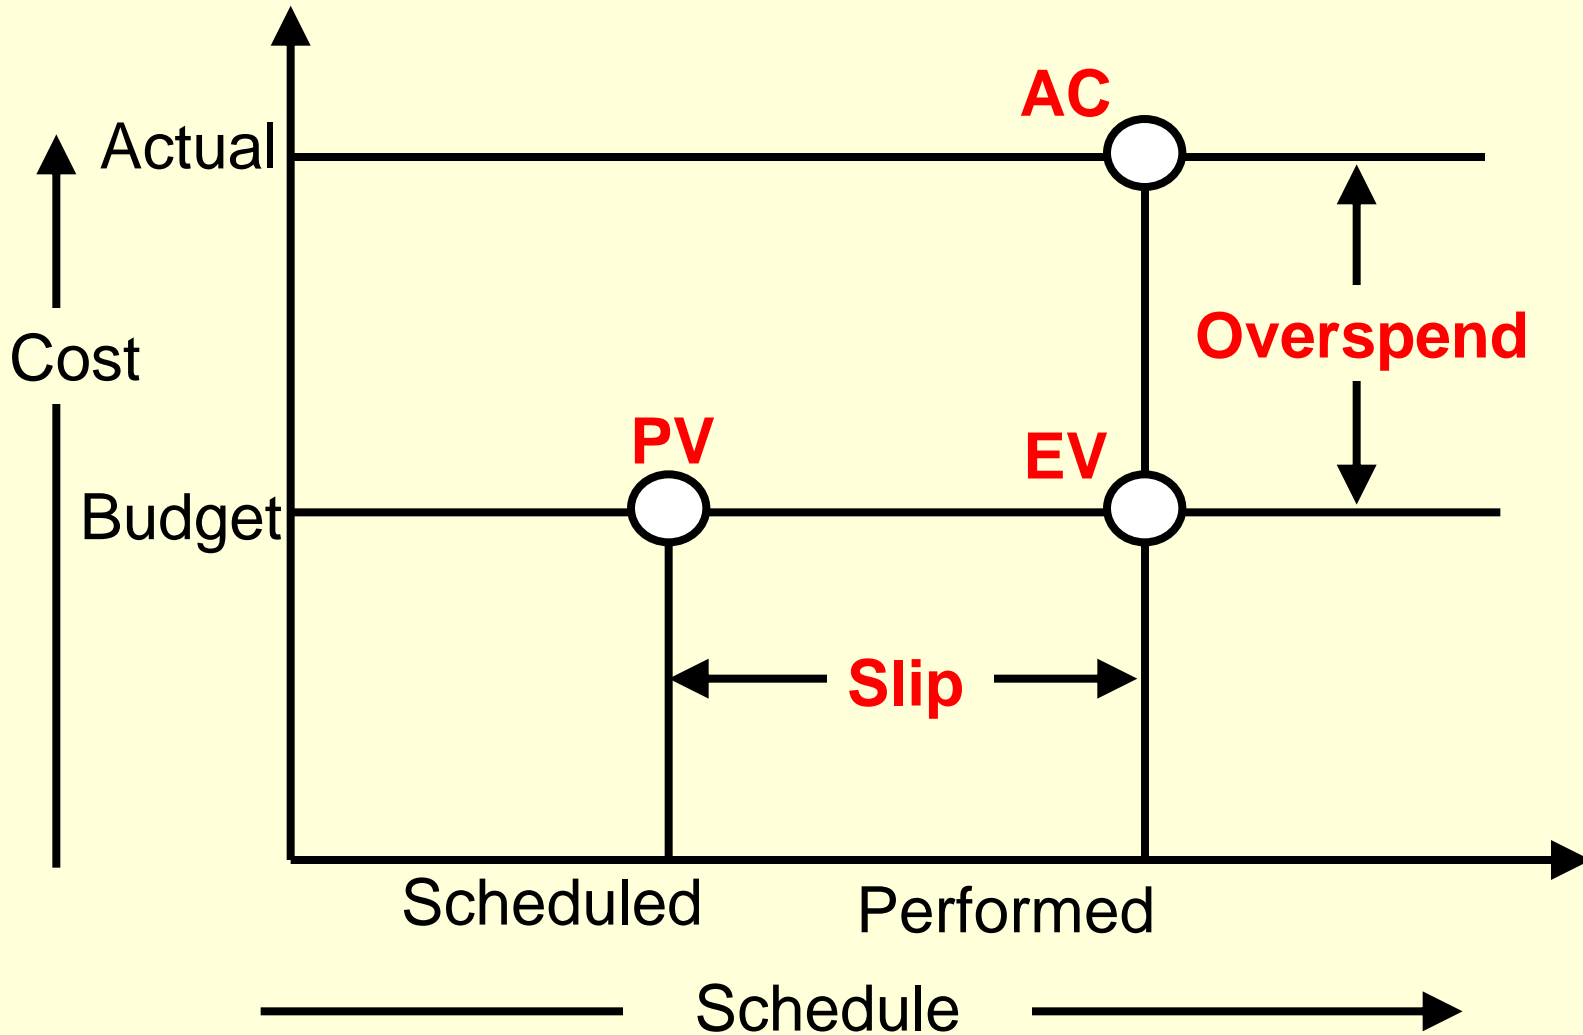

Earned Value Terms

- ❖ Planned value
- ❖ Earned value
- ❖ Actual cost of work performed
- ❖ Schedule performance index
- ❖ Cost performance index
- ❖ Budgeted cost at completion

Steps in Earned Value Management

1. Clearly define each activity including its resource needs and budget
2. Create usage schedules for activities and resources
3. Develop a time-phased budget (PV)
4. Total the actual costs of doing each task (AC)
5. Calculate both the budget variance (CV) and schedule variance (SV)

Earned Value Milestones

Earned Value Example

Value
 $8 = 80\%(10)$

Activity	Jan	Feb	Mar	April	Plan	%C	Value
Staffing	8	7			15	100	15
Blueprint			4	6	10	80	8
Prototype			2	8	10	60	6
Design				3	3	33	1
Mon Plan	8	7	6	17	38	Σ	30
Cmltv	8	15	21	38			
Mon Act	8	11	8	13			
Cmltv Act	8	19	27	40			

Earned Value
 $30 = 15 + 8 + 6 + 1$

Planned Value
 $38 = 15 + 10 + 10 + 3$

Cumulative
 $40 = 8 + 11 + 8 + 13$

Earned Value Example

Schedule Variances

Planned Value (PV) = 38 = 15+10+10+3

Earned Value (EV) = 30 = 15+8+6+1

Schedule Performance Index = .79 = 30/38 = EV/PV

Estimated Time to Completion = (1/.79)x4=5

Cost Variances

Actual Cost of Work Performed (AC) = 40 = 8+11+8+13

Cost Performance Index = .75 = 30/40 = EV/AC

Estimated Cost to Completion = 50.7 = (1/.75)x38

Completion Values in EVM

Accurate and **up-to-date** information is **critical** in the use of **EVM**

- 0/100 Rule
- 50/50 Rule
- Percentage Complete Rule

Human Factors in Project Evaluation & Control

- ❖ Optimistic progress reports
- ❖ Level of detail
- ❖ Process evaluation
- ❖ Non-technical performance measurement

Critical Success Factors in the Project Implementation Profile

1. Project mission
2. Top management support
3. Project plans & schedules
4. Client consultation
5. Personnel
6. Technical tasks
7. Client acceptance
8. Monitoring & feedback
9. Communication channels
10. Troubleshooting
